ULTIMATE PHOTOGRAPHER FORMULA

FOR REAL ESTATE PHOTOGRAPHERS

SECTION SUMMARY

In this section, we went over all the aspects of the shooting method for HDR real estate photography. Shooting with the method that I shared in this section is highly recommended, especially if you're just starting out. I don't recommend adding additional variables like lighting until you master the basics of real estate photography.

HOMEWORK

Your homework for this section of the course is to shoot your own home or a friend or family member's home to practice.

REACH US OUT

Once you do that, upload your photos to Dropbox and email us a link to those photos to feedback@realestatemediacourses.com and we'll give you some feedback on your photos. Now before you start charging for your real estate photography services we recommend getting some practice on 3-5 properties. So you can get a real good handle on real estate photography.
