ULTIMATE PHOTOGRAPHER FORMULA

FOR REAL ESTATE PHOTOGRAPHERS

INTRO - THE SYSTEMS

In this section of the course, I'm going to go over the basic systems you'll need to get your real estate photography business up and running.

The basic systems you'll need include a website, an order form, a free Gmail account, a system for scheduling, and systems for delivering invoicing and payment processing.

When you're just starting it's important to keep things basic and as cheap as possible so you can retain as much revenue as you can to use for business growth.

It's also important to make it easy for your customers to do business with you and having the right systems will help you accomplish just that. I'm excited to share the systems with you.
